

ARGIE P. BELOA

Mobile Developer & Backend Developer

Doña Carmen, Brgy. Commonwealth, District II, Quezon City, PH 1113 • 09942049986 • argiepbelo@gmail.com

Portfolio: silver-lokum-e76cea.netlify.app • GitHub: github.com/ArgieBelo

PROFESSIONAL SUMMARY

Mobile and Back-end Developer who designed, built, and shipped CPC Notify, a full-stack school notification system serving 2,500+ active users, and has since delivered a live client website. Skilled in React Native (Typescript) for cross-platform mobile apps and Spring Boot (Java) for secure, scalable backend services, with hands-on experience in RESTful API design, MongoDB, and JWT/Basic Auth authentication.

SKILLS

React Native (Typescript)	Spring Boot (Java)	RESTful API Design	MongoDB
JWT & Spring Security	Expo	Git / GitHub	Node.js

EXPERIENCE

Mobile & Back-end Developer — CPC Notify (Capstone Project) Jan 2026 – Jun 2026

Colegio De la Purisima Concepcion • Roxas, Capiz, Philippines

- Built and shipped CPC Notify, a full-stack notification system adopted by 2,500+ students and staff, with a stable real-time client-server connection for reliable message delivery.
- Designed and developed the back-end with Spring Boot (Java), building secure, scalable RESTful APIs to support the mobile application.
- Implemented authentication and authorization with JWT and Basic Auth, controlling access across different user roles.
- Built and managed MongoDB databases for storing and retrieving user and notification data at scale.
- Developed the cross-platform mobile client using React Native and TypeScript, integrating REST APIs for real-time data updates.
- Applied user-centered design principles to keep the interface simple for a largely non-technical school audience.

PROJECTS

Bofill — Client Website

Freelance / Client Project

- Designed, built, and deployed a live website for a private client, delivering a polished, production-ready site from concept to launch.
- Created an email marketing funnel to capture leads and nurture prospects through automated follow-up sequences.
- Applied on-page and technical SEO best practices (metadata, site structure, page speed) to improve search visibility.
- Configured cloud hosting and deployment on Vercel, ensuring fast load times and reliable uptime.
- Managed the end-to-end client relationship, translating business goals into a functional, conversion-focused site.
